

Heyplast N50Z

Natural Rubber, Mooney Viscosity controlled to 60, Granulated

Description

Heyplast N50Z is a TSRCV50 type natural rubber in the form of fine granules. It contains 3% zinc stearate as a partitioning agent.

It is a very pure grade of rubber and is typically yellow in colour.

Features and Characteristics

- Characteristics typical of top quality TSRCV50 natural rubber
- Dissolved easily in the normal solvents used for natural rubber
- Very uniform quality
- Residue on 4 mm sieve maximum 10%

End Use Applications

End uses include adhesives, pressure sensitive tapes, coatings, binder for fabrics and twin-scroll extruder compounds.

Packing

- Cartons of 25 kg net weight
- 18 cartons per crate
- Net weight per crate 450 kilos or 992.07 pounds

Origin

Country: Vietnam

Test Limits and Typical Properties

Property	Unit	Typical	Specification
Ash	% wt	0.23	1.0 max
Volatile Matter	% wt	0.29	0.80 max
Mooney Viscosity ML 1+4 @ 100c		50	55 to 65
Particle size: 4.0 mm test screen	%	6.0	10% max
Particle size: 3.15mm test screen	%	37.0	-
Particle size: 2.0 mm test screen	%	67.0	-

- All tests on the samples are carried out according to Vietnamese Standard TCVN 3769-95.
- The technical data listed in this publication are typical values. There may therefore be slight differences between the elements of a supplied product and the data.

Note: This product has been discontinued by the producer and there are no equivalent products available.
