

Titanium Dioxide

Description

Titanium Dioxide is a white powder used as a pigment in the rubber, paint, paper and ceramic industries.

We sell an **Anatase** grade that is of high enough purity and low enough price for use in rubber mixing.

Origin

Country: South Korea

Titanium Dioxide Anatase (KA-100) Properties

Property	Specification	
TiO ₂	min	98.0%
Particle Size		0.3 +/- 0.05
Tinting Strength of Reynolds	min	1280
Oil Absorption	max	25 ml/100g
Residue (325 Mesh)	max	0.015%
